1.6 Scoring:

1.6.1 Championship Competitors may count up to 8 results towards the National Championship, which must include at least 2 results obtained from their “away region” (i.e. not their designated home region). Of the 8 results, no more than 6 may be selected from each discipline, hillclimb or sprint. Venues which are designated as both North and South will count as an “away region”. A maximum of 12 scores to be allowed for the sole purpose of resolving ties (see 1.6.2).

1.6.1.1 The overall winner will be determined as the series winner with the highest total Class Ranking Percentage from their best 8 scores in either region as defined in 1.6.1.

1.6.1.2 Region competitors must nominate a “home” series. Competitors may count up to 6 Regional results towards that Region’s series award. No more than 5 may be selected from either discipline. A maximum of twelve scores to be allowed for the sole purpose of resolving ties (See 1.6.2)

1.6.1.3 The region winners will be determined as the competitors with the highest class ranking percentage as defined in 1.6.1.5.

- 1.6.1.4 For Groups 1 to 4, a list of model specific records and Target Times will be published at the start of the season for each venue in the championship calendar. For Groups 5 and 6, a single Target Time for each Group at each capacity split will be published at the start of the season for each venue in the championship calendar. All queries must be raised with the Championship Coordinator before the first Championship round.
- 1.6.1.5 In the event of a more highly modified car having a Target Time that is more advantageous than the Group(s) below, that Target Time will be substituted for the Target Time of the lower Group. This Regulation applies to Groups 1 to 4 only and will not be applied to Groups 5 or 6.
- 1.6.1.6 Class Ranking Percentage will be allocated at each meeting in the following manner:
- Points will be scored against the Model Target Time.
(Model Target Time / Competitors Event Time) x100 = Class Ranking Percentage
- For example: Model Target Time = 110.00 seconds
- Example 1: Competitors Event Time is 108.00 seconds, then the score is (110.00 / 108.00) x 100 = 101.85 Class Ranking Percentage
- Example 2: Competitors Event Time is 104.99 seconds then the score is (110.00 / 104.99) x 100 = 104.77 Class Ranking Percentage
- Example 3: Competitors Event Time is 113.47 seconds, then the score is (110.00 / 113.74) x 100 = 96.94 Class Ranking Percentage
- The Maximum Class Ranking Percentage that will be recorded for Championship scoring will be 102%. In Example 2 above, the score will be 102.00 points.
- 1.6.1.7 A record will be deleted after ten years if it has not been achieved by any competitor within that period. Where the data exists, a new Model Target Time will be created from the model records set within the ten-year timeframe. Where no data exists, Regulations 1.6.1.8 and 1.6.1.9 will apply.
- 1.6.1.8 For venues where no model records exist or venues with limited history of model event results (i.e. those with fewer than four model event results), Target Times will be calculated retrospectively based on the event times. The target shall be set at 95% of the fastest recorded event time, potentially attracting a maximum score of 95.00 points (see 1.6.1.9). Once three model event results have been recorded for the venue, the Target Time shall be set at 100% of the model's fastest event time. Model records may only be set at designated Championship Rounds.
- 1.6.1.9 In all circumstances, Regulation 1.6.1.5 will be applied to ensure a more highly modified car does not have a target time that is more advantageous than the classes below. If this is the case, the target time from the lower class will be used to calculate the event score.
- 1.6.2 In the event of a tie, the winner of an award will be determined from a count back procedure as follows:
- National Championship: If a competitor's score is derived from an equal number of events of each discipline, that competitor's 9th, 10th, etc. best scores for each discipline will be added progressively, alternating between sprints and hillclimbs, until the tie is resolved. The competitor may select which type of event to count first. If a competitor's score is derived from a different number of each type of event, his 3rd and 4th best scores of the deficient discipline, then 5th best score of each event type will be added progressively. The competitor may choose which 6th best score, Sprint or Hillclimb, to add first. No more than 12 events will be allowed for this procedure. If there is still a tie, the trophy will be awarded jointly.
- Regional Series: If a competitor's score is derived from an equal number of events of each discipline that competitor's 5th and 6th best scores for each discipline will be added progressively, alternating between sprints and hillclimbs, until the tie is resolved. The competitor may select which type of event to count first. If a competitor's score is derived from a different number of each type of event, his 4th and 5th best scores of the deficient discipline, then 6th best score of each event type will be added progressively. The competitor may choose which 6th best score, Sprint or Hillclimb, to add first. No more than 12 events will be allowed for this procedure. If there is still a tie, the trophy will be awarded jointly.

1.6.3 A set of Target Times will be published at least five weeks prior to the first event in the Calendar. Any appeal against a Target Time must be registered not less than one week prior to the first event on the Calendar, after which Target Times will be valid for the remainder of the season.
